**CERT TRAINING** is designed to prepare you to help yourself, your family, and your neighbors in the event of a catastrophic disaster. Because emergency services personnel will not be able to help everyone immediately, you can make a difference by using CERT training to save lives and protect property. This training covers basic skills that are important to know in a disaster when emergency services are not available. With training and practice and by working as a team, you will be able to do the greatest good for the greatest number of people after a disaster, while protecting yourself from becoming a victim. The job of trained CERTs is not to add to the burden of professional emergency services, but to manage existing resources until professional assistance becomes available.
